

Care & Maintenance

Carpet

DRY VACUUM REGULARLY

- As often as necessary, but at least once a week, especially in high traffic areas. This will remove free soil particles and surface litter and prevents soil becoming embedded in the carpet.
- Pay particular attention to the areas around doorways and skirtings which are often the first place for insects and moths to reside. Every few months vacuum under infrequently moved furniture.

PROMPTLY ATTEND TO SPILLS AND STAINS

- Spills should be blotted up by dabbing, do not vigorously rub as this will spread the stain and may cause fuzzing of the area.
- It is best to work from the outside of the stain towards the middle as this will avoid further spreading.
- Most importantly, rinse the cleaned area with cold water as soon as possible.

PROFESSIONALLY STEAM CLEAN

- It is worth getting your carpet professionally steam cleaned by a reputable operator at least once a year, or as often as required.
- This will remove entrapped soil particles and revive the appearance of your carpet.
